

OCEANBLUE LIVING

Transform your living space with crafted metalworks.

Durable.
Functional.
And beautiful.

We make elegant, functional, and timeless architectural applications that transform your living spaces. From screens, panels, gates and letterboxes, to signage, wall art and garden sculpture, our metalworks are durable, weatherproof and beautiful.

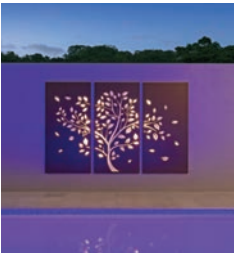

We tranform living spaces. And we transform work spaces, including facades for commercial buildings.

We use water-jet cutting technology to precisely cut metal from business card to wall sizes, in a range of materials and colours.

Design your own, choose from our pattern range or bring your own idea and let us help you turn it into reality.

Our products are proudly designed and built in our Cairns workshop, and shipped Australia-wide.

Our range of products:

Screens

Gates

Outdoor

Commercial

Screens redefine space.

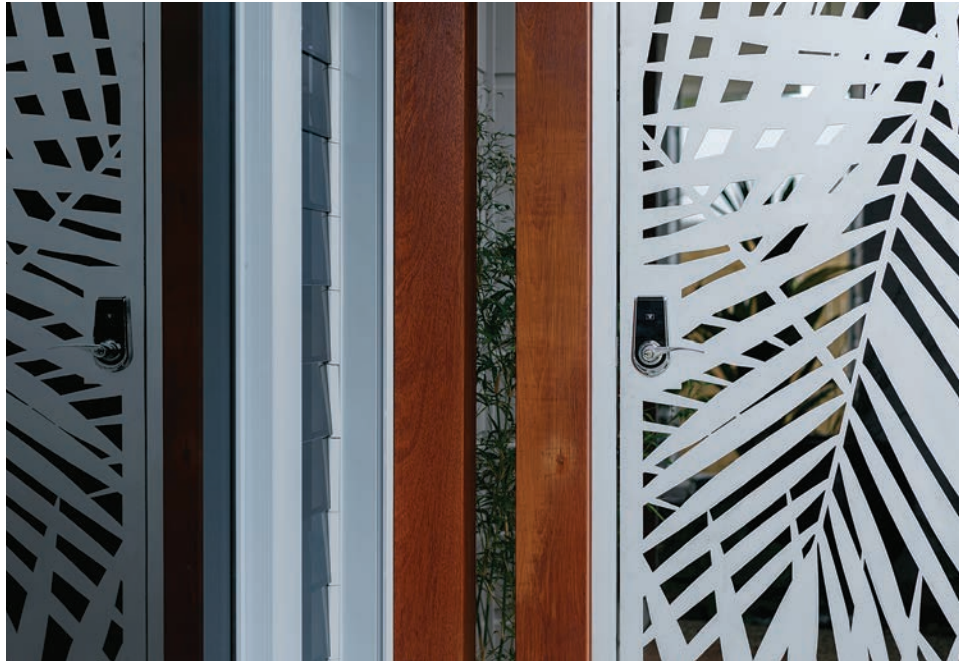

Create shade and privacy. Add a visual break. Hide or reframe a view. Segment a room. Redirect paths through your house or office. And make it beautiful.

Screens can be scaled into facades. Revitalise your commercial space with an architectural facade.

Our screens are weatherproof, so they can be used both indoors and outdoors. And they're durable—we guarantee our finishes to industry standards. Our screens surpass building compliance codes and are precisely installed to the highest standard.

Notes
Max single screen (Corten) 1200 x 2400mm
Max single screen (Aluminium) . . . 1500 x 3000mm
We can join any number of screens together.
Materials: corten steel, stainless steel or aluminium.
Finishes: raw or powdercoated.
Colours: Interpon powder-coating colour range.
On-site installation is available.
We can supply frames and fixings if required.

Secure, durable gates.

Our gates are safe, strong and secure yet aesthetically pleasing, blending into and enhancing your living environment rather than compromising it. They can be remotely operated with buttons or your smartphone.

Our pattern designs increase privacy without restricting airflow, and allow a great range of versatility in application.

All our gates surpass building compliance codes, including safe edges, and are installed with the technical craftsmanship we pride ourselves on.

Notes

- All gate sizes are custom, depending on your requirements.
- Materials: corten steel or aluminium.
- Finishes: raw or powdercoated.
- Colours: Interpon powder-coating colour range.
- Multiple lock types are available.
- Centsys Automation is available, with both remote and solar-powered options
- On-site installation is available.
- We can supply frames and fixings if required.

Rugged outdoor versatility.

Our outdoor range includes letterboxes, fire-pits, columns and sculpture. Our versatile cutting technology means that if you have an idea, we can create it.

Our outdoor metalworks broaden your living spaces—which is especially useful in tropical Queensland—by complementing your existing living spaces using architectural objects that blend into your natural surroundings. All-weather durable finishes and materials mean the objects improve in appearance with age.

Notes

Letterboxes and firepits are available in small, medium and large fixed dimensions.

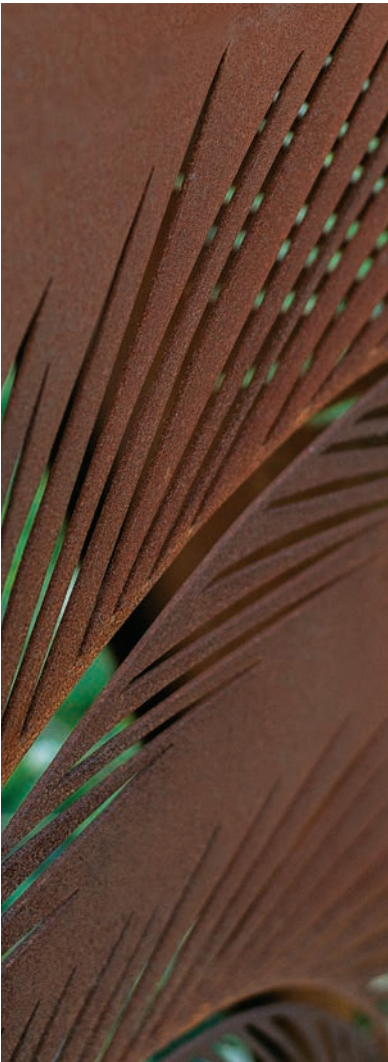

Sculpture and column sizes are custom, depending on your design.

Materials: corten steel, stainless steel or aluminium (except firepits).

Finishes: raw or powdercoated (except firepits).

Colours: Interpon powder-coating colour range (except firepits).

On-site installation is available.
We can supply frames and fixings if required.

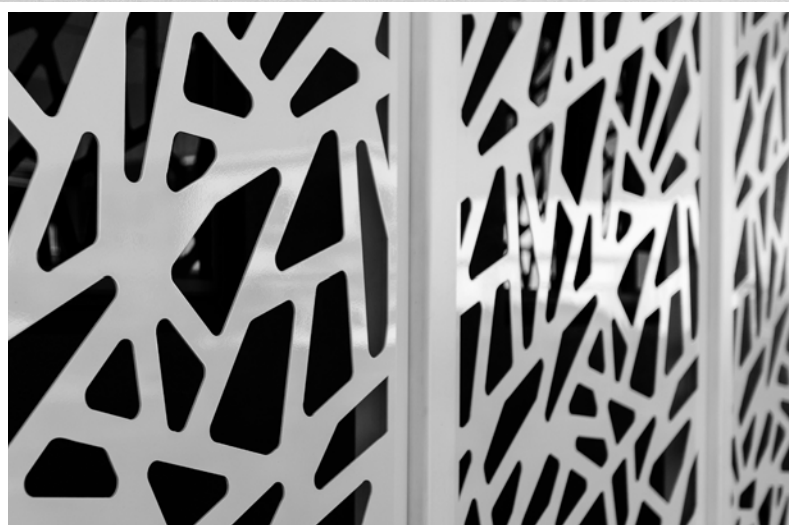

Craft at commercial scale.

We love collaborating with architects, builders, designers and artists. We can handle all aspects of a project, from design through to fabrication, delivery and installation.

Our screens and facades are easily scalable and lightweight, so they're quick to install and they reduce load on structural components.

Our aluminium screens have a greater lifespan relative to composite materials, keeping your building branded for many years.

Notes

Max single screen (Corten) 1200 x 2400mm

Max single screen (Aluminium) ... 1500 x 3000mm

We can join any number of screens together.

Materials: corten steel, stainless steel or aluminium.

Colours: Interpon powder-coating colour range.

On-site installation is available.

We can supply frames and fixings if required.

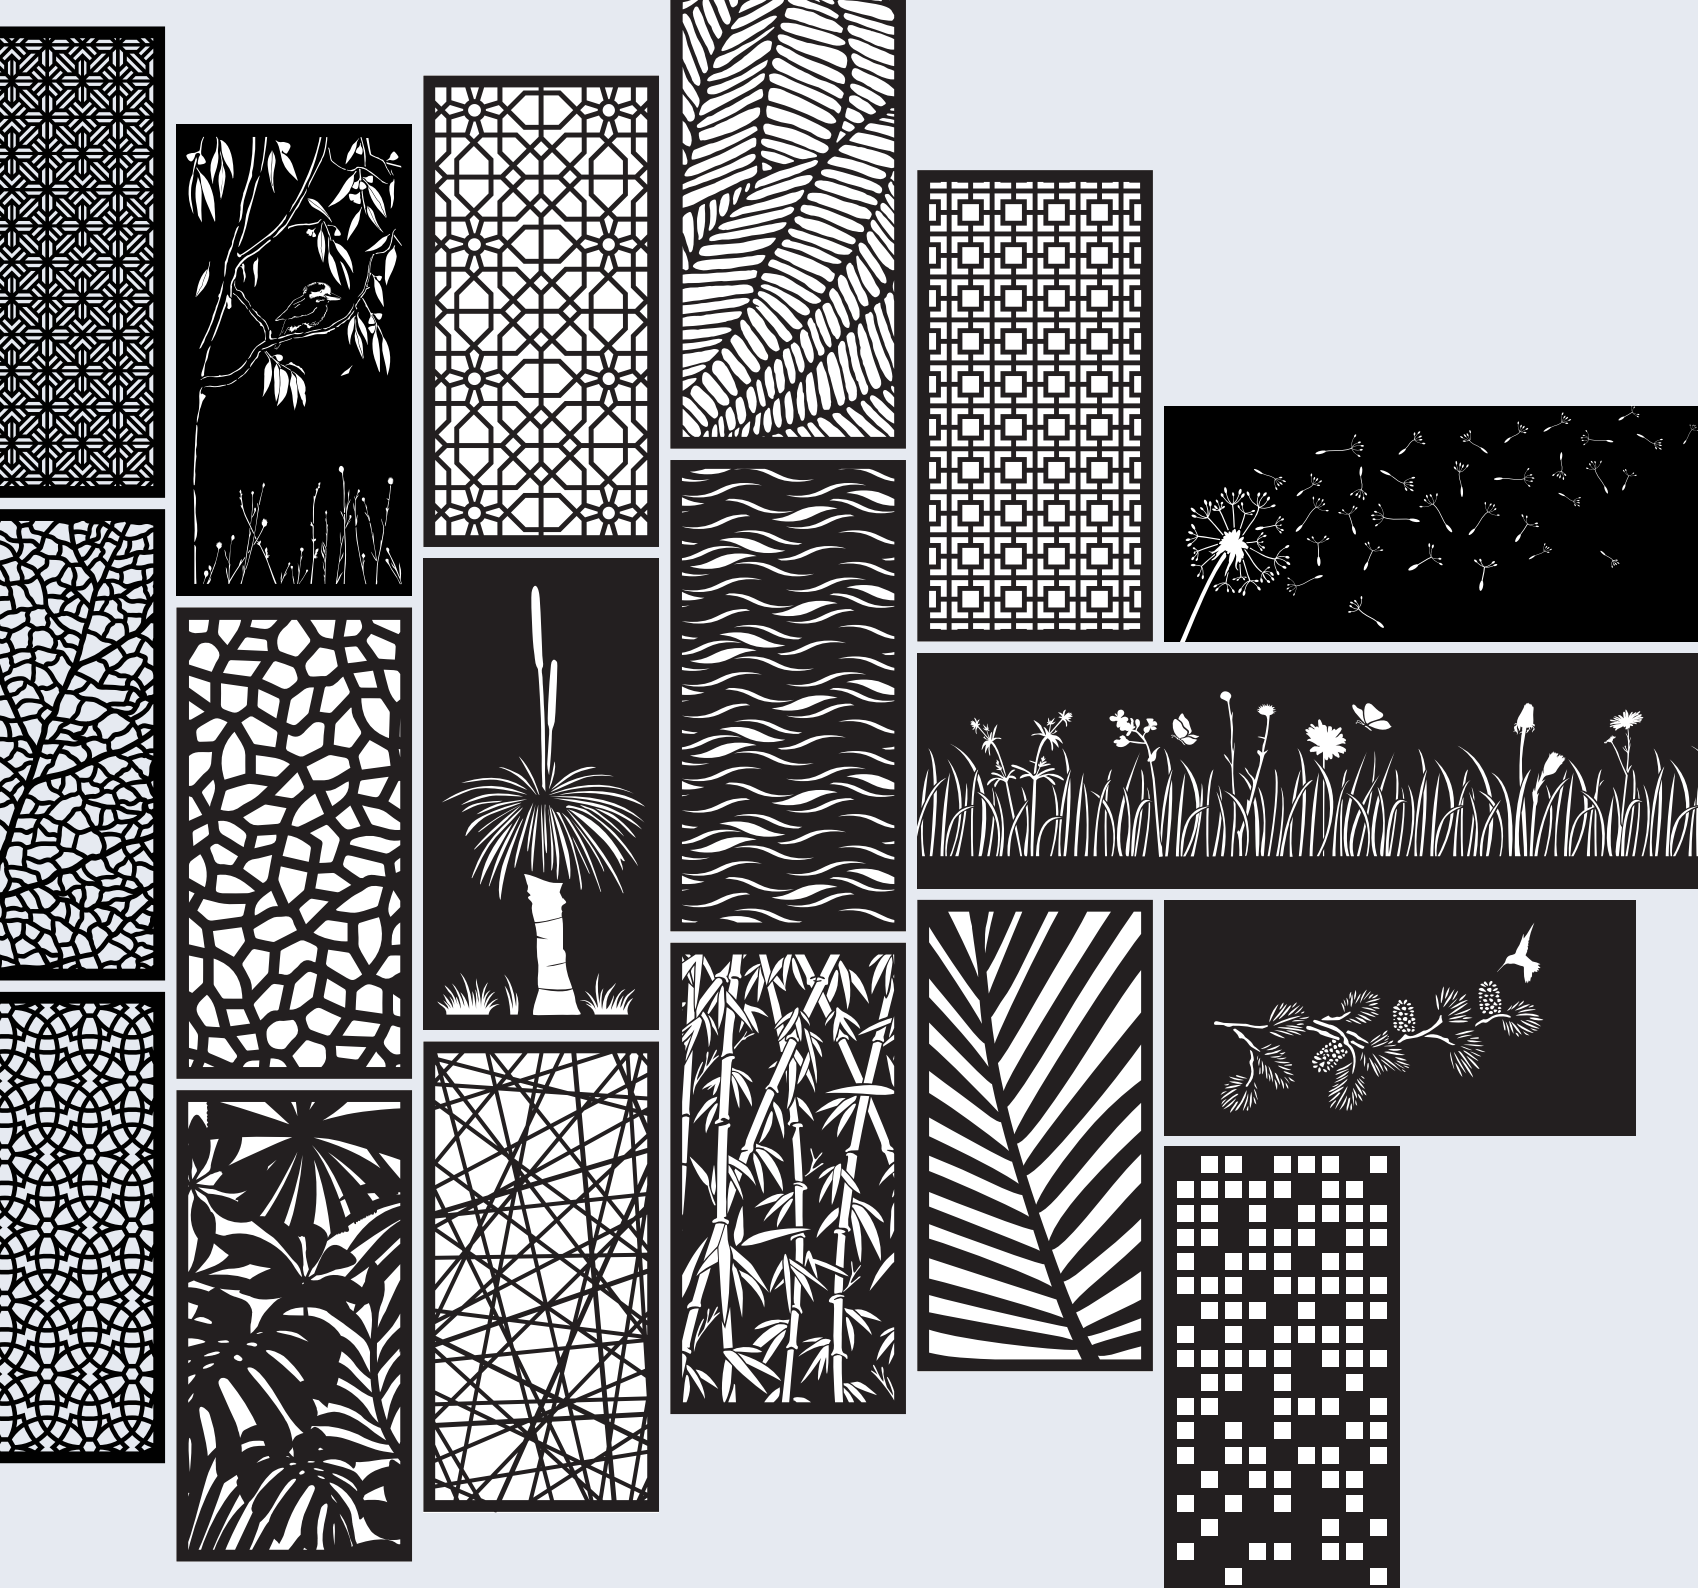

Everything we
do is proudly
designed & built
in our Cairns
workshop.

We are boat builders by trade. And boats
have to work. Our technical proficiency
comes from two decades of surpassing
maritime building standards.

Create
your own,
or choose
a pattern.

We're craftspeople
who love transforming
living spaces.

Boat builders by trade, OceanBlue Living was founded by Vince and LeaAnne Cassaniti in 2003, and has evolved from a partnership into a team of craftspeople with both design and technical skillsets who have the knowhow and experience to bring your ideas to life.

We believe in the transformational effect of spaces: spaces that people want to be in, that help people work, and live. We're here to help you discover, design and fabricate architectural pieces that make ideas real and transform your living spaces.
